## Reutlingen University

# Our Profile

## Welcome!

Reutlingen University is one of the leading universities offering international academic programmes with close ties to industry and commerce. Thanks to its living international dimension, values-based teaching and close collaboration with the business world, the University enjoys an excellent reputation both within Germany and abroad.

This is reflected in repeated number-one positions in university league tables and in surveys carried out among corporate HR managers. They confirm the high standards of the University's programmes and the top-class academic education it provides.

We have nearly 5.400 students enrolled in five different Schools. 160 Professors, together with a large number of Visiting Lecturers and other members of staff support these talented young people along their academic path.

You are very welcome to pay us a personal visit and find out for yourselves what life is like at Reutlingen University. We look forward to meeting you!

Prof. Dr. Hendrik Brumme  
President of  
Reutlingen University

## \*Close contacts with business

Among the businesses which collaborate with Reutlingen University there are both global players and high-performing small and medium-sized enterprises. Professors and other teaching staff from the business world integrate current developments directly into their courses, thus ensuring that what the students learn has a clear practical orientation.

Further advantages:

- › Reutlingen University makes future issues its own with an innovative concept for teaching and research centres. We teach and conduct research within strong alliances of universities, universities of applied sciences and businesses.
- › Advisory boards and other sponsoring and support groups guarantee a lively exchange between theory and practice.

## \*A sense of values

It is of central concern to the University that its programmes transmit values such as responsibility, respect, reliability and tolerance. We support our students in their personal development, and they graduate as specialists and managers for whom social responsibility is second nature.

## \*Continuing education

Education means not only gaining a first qualification, but also continuing education. Only a process of on-going continuing education can pave the way to a successful career and keep the expertise of personnel up to date. Therefore Reutlingen University, together with the Association of Friends of the University (Campus Reutlingen e. V.), established the "Knowledge Foundation".

- › This foundation offers executive programmes, seminars and customised training courses in all areas of expertise of the University's five Schools.
- › The latest knowledge from research and practice is combined with comprehensive solutions at the highest level.

## \*The international dimension

Since its foundation in 1855, internationality has been one of the central hallmarks of Reutlingen University. That's why in 2010 we were awarded the title "International University" by the German Academic Exchange Service and the Donors Association for the Promotion of Science and Humanities in Germany.

- › We co-operate with more than 200 partner universities worldwide.
- › 20 per cent of the student body have an international background and come from 100 different countries.
- › Each semester around 600 Reutlingen students go abroad either to study or to complete an internship.
- › Our students can acquire recognised double degrees in more than ten countries.

## \*Applied Research

Reutlingen University is a successful partner in Research and Development. Activities in the fields of research, development and technology transfer are combined under the umbrella of our central academic facility, the Reutlingen Research Institute (RRI).

- › The RRI sees itself as a competent partner for industry and enterprises as well as for other research institutes and universities.
- › Our aim is to work together with these partners on demanding projects.
- › Students are actively included in these projects, because in today's world applied research is an integral part of academic programmes.
